

King Critter #20118-3

Thank you for purchasing a Lucky Duck™ Premium Decoy. To view additional Lucky Duck™ products please visit your local Sporting Goods dealer or logon to our website at www.luckyduck.com.

The King Critter is the ultimate predator decoy that was built to handle extreme conditions. With erratic motion from the magnetic decoy, it is bound to bring in any predator. The King Critter has 2 speed settings for the decoy and includes a tripod stand. There is also a 3.5mm port compatible with most e-caller remotes with auxiliary function.

Set-up Instructions:

1. Install 4AA batteries in the back of the decoy base.
DO NOT MIX OLD & NEW BATTERIES. DO NOT MIX ALKALINE, STANDARD (carbon zinc) or RECHARGEABLE (ni-cad, ni-mh, etc) BATTERIES.
2. Attach critter decoy to the magnetic connector on the top of the decoy base.
3. Thread the tripod base onto the bottom of the decoy base.
4. Set decoy to high or low speed.
5. Switch the decoy on.

Notes:

- The motor base features a ¼ 20 thread on the bottom which will fit most standard tripods if you need to raise the decoy higher off the ground.
- The auxiliary plug allows the decoy base to be controlled remotely by an electronic caller with the auxiliary function. Simply plug one end of a 3.5mm cord (not included) into the auxiliary jack on the decoy base and plug the other end into the electronic caller. Turn the decoy on. If the electronic caller is compatible you should be able to use the auxiliary function on the callers remote to turn the decoy on and off. The decoy must be turned on for the auxiliary function to work.
